

Emerson Impact Partner

ECI specializes in process control and automation products and solutions for manufacturing and industrial customers in the oil and gas, chemical, power, food and beverage, mining and metals, life sciences, pulp and paper, refining, petrochemical, OEM and nuclear industries. In addition, as an Emerson Impact Partner, ECI provides engineering, site support and training services for customers.

Founded in 1956, ECI operates on the principles of quality, reliability and safety, offering unmatched product and service solutions. ECI is an ISO 9001:2015 registered company and employs over 250 professionals across western Pennsylvania, West Virginia, Ohio and western Maryland. The Pittsburgh Post-Gazette has honored ECI with multiple consecutive Top Workplace Awards.

History and Expertise

With deep roots in the region and with Emerson, ECI offers a level of expertise and solutions-driven approach that creates a partnership with customers. ECI started as a representative of the Fisher Governor Company and grew with the industry in this region. As the Fisher organization advanced and later became part of Emerson, ECI became a trusted resource and the region's leading process control and automation solutions provider.

With more than 60 years of experience, ECI has been a part of the changes and maturation of the businesses and industries that call this region home, including the development of the Marcellus and Utica shale plays. That experience has led to the introduction of products and services that specifically address customers' needs.

Emerson Impact Partner

As a member of the Emerson Impact Partner network, ECI is certified to deliver the highest level of customer support. ECI is the exclusive Emerson representative in this territory and offers a comprehensive portfolio of solutions from control systems through instrumentation.

- **Final Control** – Industry-leading control, isolation and pressure management valves
- **Process Systems** – Comprehensive array of superior technologies, all connected through PlantWeb® digital plant architecture
- **Reliability Solutions** – Best-in-class technologies integrated with asset management strategies
- **Remote Automation** – Flow computers, SCADA solutions and remote terminal units for the oil and gas industry
- **Skid Technologies** – Custom prefabricated process control skids

Product Offering

Actuators | Control Valves & Accessories | Instrumentation | Isolation Valves | Oil & Gas Automation
Pressure Management | Process Control | Pumps | Reliability Solutions | Regulators | Steam | Wireless Technology

Services and Solutions

High-quality products are only one element of our solutions-oriented approach to helping customers reach their goals. Full life-cycle support services deliver a streamlined, single-source experience. From warehousing and inventory to engineering, valve repair and electrical panel design, ECI's comprehensive service capabilities save customers time and deliver an enhanced level of expertise as every aspect of the products, their installation, commissioning and maintenance are understood and managed daily.

Service is performed both on- and off-site. Our centrally located 135,000-square-foot facility offers a range of services including valve assembly and repair, skid fabrication and warehousing including counter service. To address customers' on-site needs, our highly trained field service technicians are deployed to perform diagnostics and repairs, and to assist with outages and emergencies. We are a National Board Certified repair center for steam, liquid and gas safety relief valves.

A comprehensive view of customers' operational needs enables the delivery of customized solutions that contribute to overall performance...

Reliability Solutions

To help plants achieve maximum capacity and minimize downtime, ECI offers an array of reliability solutions that include predictive, corrective, electrical and professional solutions, all designed for seamless operations.

Plant Life-Cycle Services

At every stage in a plant's life cycle – startup, maximizing operation, turnaround/outage, or life extension – healthy assets are the way to a healthier bottom line. ECI will partner with you at every stage to help realize the true potential of your instruments and valves.

Process Solutions

Our complete solutions optimize a plant's production processes through intelligent field devices plus robust diagnostic and control software, backed by consulting and engineering expertise. Our comprehensive technology offering is connected through the award-winning PlantWeb® digital plant architecture.

Remote Automation

ECI utilizes high-performance remote measurement and control from Emerson, serving as the single source for all needs from field equipment to the business system. Our industry-specific expertise in oil and gas, water and wastewater, along with best-in-class products, help you achieve peak financial performance and long-term sustainability.
