Join ECI for our free Tank University featuring an introduction to storage tank safety solutions, including tank blanketing, pressure relief and emergency valves, and flame arrestors. Learn about considerations for storing liquids in tanks, sizing and selection, and potential incidents and preventative measures. Products will be available for hands-on demonstrations.

Agenda:

- Introduction to Storage Tanks
- Venting Guidelines (API 2000)
- Tank Pressure and Relief Vents
- Tank Blanketing and Regulators
- Flame and Detonation Arrestors
- Tank Optimization and Surveys
- Wireless Level Measurement
- Level Detectors and Transmitters
- Nitrogen Blanketing
- Emergency and Pressure Relief Settings

Presenters:

Steve Ludtman

- Emerson Regional Manager
- 23 years of pressure regulator experience
- Instructor: Emerson's Gas Conference and training programs; Appalachian Gas Short Course

Bill Pace

- Field Level Specialist for Emerson's Rosemount
- 30 years of applications engineering experience
- Leads Rosemount's process level efforts in the Northeast

Prerequisite Recommendation:
An understanding of API 2000 and API 2350 is helpful, but not required.
