

Steam University™ Seminar

A Practical Approach To Understanding Steam Systems

Steam University is a comprehensive introduction to final control applications in steam systems. The purpose of the course is to provide an overview of key steam generation and distribution applications, including boiler blowdown, boiler level monitoring, pressure relief, steam trapping, pump protection and pressure reduction. The course includes real-world examples, best practices, selection criteria and maintenance tips for effective operation.

Topics	Ideal Participants
<ul style="list-style-type: none">• Introduction to Steam Systems• Steam Generation Overview• Pressure Relief Applications• Boiler Blowoff and Blowdown• Boiler Level Monitoring• Steam Distribution Overview• Trapping Fundamentals• Steam Trap Maintenance and Testing• Pressure Reduction Applications	<ul style="list-style-type: none">• Plant Managers• Maintenance Technicians• Reliability Professionals• Process Engineers• Safety Managers• Operations Managers• Maintenance Managers

Dates and Locations:

January 28, 2020 - Holiday Inn Lima, OH
January 29, 2020 - Sheraton Suites Cuyahoga Falls, OH
January 30, 2020 - Wingate Vienna, WV

Time: 8:30am - 4:30pm
