

Precision, accuracy and speed can elevate your operations.

An enhanced product offering leads to improved customer loyalty and retention, and the ability grow your business. However, the technology investment required to make these enhancements can be cost prohibitive. The ECI Panel Shop can be the cost effective, quality driven solution you need.

Emerson Impact Partner

Extend Your Quality with CNC Machine Capabilities

The ECI Panel Shop can partner with you to help you deliver the improved quality you need in an efficient manner.

Precision Through Automation

Precision, efficiency and short turnaround times are available through the ECI Panel Shop because of our investment in a state-of-the-art Steinhauser ModCenter CNC machine. The ECI Panel Shop delivers accuracy and consistency through automated cutting and drilling. The automation drives repeatable accuracy that delivers quality with every cut and is especially beneficial for customers requiring multiple panels.

You can benefit from the speed and efficiency accessible with the Steinhauser CNC ModCenter machine by utilizing the ECI Panel Shop for all of your custom panel, cabinet and enclosure needs. Whether you have a customer project with an advanced timeline, want to improve quality, or need to correct an error in a panel you've received from a vendor, we can help. Our local facility operates under a single mission – deliver high quality, custom electrical panels and control cabinets that enable success.

Local, Responsive Service

As a local shop, we can eliminate shipping delays and schedule delivery or pick up times that meet your schedule. The close proximity of our CNC machine to your operations can create a significant advantage for you. The ECI Panel Shop houses an inventory of parts and components that enables us to build panels quickly.

Custom Specifications

Our capabilities extend to a full range of sizes and solutions. With the CNC machine's handling capacity, larger panels are not a challenge. From junction boxes to 6-foot by 6-foot cabinets, we are prepared to meet your customers' needs. Established relationships with a range of manufactures ensures that panel specifications are developed to support the customer's objectives. Our technicians can work with any components, build to any size and meet the requirements of any application.

Improved Quality and Expediency

Your relationship with the ECI Panel Shop can be seamless or transparent. We support your business with professionalism and quality. With the capabilities of a CNC machine supporting your operations, you save time and cost while providing a better product to your customers. The CNC machine improves response time, enabling you to complete projects faster and expand your capacity.
